2.3 Teaching- Learning Process

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences using ICT tools.

Response:

The college enables the efficient execution of the teaching-learning process. Student-centered approaches, such as experiential learning, participatory learning, and collaborative learning methodologies, are employed to enhance learning experiences through the use of ICT technologies. Experimental and interactive learning enhances the comprehensive comprehension of the subject matter and its practical implementation.

Experiential Learning:

- Our college has established industry-powered centres to provide training to students in emerging technologies. This is done through signing Memorandums of Understanding (MOUs) with industries, which enables our students to undertake four to six-week internships where they work in the field. Additionally, final year students complete their projects by conducting experiments in various industries. Industry experts offer their expertise and experience to provide guidance for the successful execution of projects.
- Our college has implemented many e-learning tools and resources such as NPTEL, ATAL, COURSERA, MOOCs, Learning Management System (LMS), Content Management System, e-books, and e-journals, as well as a digital library. These resources aim to enhance students' creative thinking abilities in technical and research domains.

Participative Learning:

- Students are encouraged to actively engage in various activities such as projects, seminars, model competitions, and national and state-level competitions and projects. Each department organises programmes for learners to engage in various activities and acquire knowledge independently. Students are inclined to enroll in Massive Open Online Courses (MOOCs) provided by prestigious institutions, which encompass online lectures, demonstrations, and interaction facilitated by ICT.
- Students are provided with a choice of educational events, such as seminars, webinars, workshops, and study tours, which focus on new issues.

- We promote major projects that utilise the newest technologies.

Problem-solving Methodologies:

- It involves assigning students with tasks that require higher levels of thinking. These tasks aim to help students break down complex ideas into simpler bits and uncover evidence to support their self-learning abilities.
- Students are urged to seek answers for real-time problems through the use of case studies and by engaging in field or industrial projects and visits.
- Students undertake industry-based projects.

Activity Report

Title	Industrial Automation and Control
Duration	32 Hrs.
Name of speaker	Mr. Chittaranjan Mahajan
Designation	CEO, Dolphin Lab ,Pune
Objectives	The technology of industrial automation and control, which is commonly used in factories of all kinds for both discrete and continuous manufacturing, is introduced in this course. Discrete and continuous variable control systems, industrial communication, embedded computing, CNC machines, hydraulic, pneumatic, and electric actuators, measurement systems, including sensors and signal conditioning, and many other related topics are covered.
Beneficiary	BE Mechanical Engineering
Number of Participants	56
Course Outcome	Student shall be fulfill about knowledge of automation used in industry. Student will understand the control systems, industrial communication, embedded computing, CNC machines, hydraulic, pneumatic, and electric actuators, measurement systems, including sensors and signal conditioning.

Subject: Invitation to Conduct Workshop on: **"Electric Vehicle"**

Respected sir,

The Department of Mechanical Engineering is pleased to invite you to conduct workshop on **"Electric Vehicle"** in a month of **April-2022**. The aim of this session is to give knowledge about Overview of Electric and Hybrid Electric Vehicles and deep learning about advancement in EV to make easier Human life. Your experience will definitely help our students to discover new opportunities in the field of manufacturing.

We look forward to a positive response from you soon.

Thanking You.

Dear Sir,

On behalf of Department of Mechanical Engineering, Rajiv Gandhi College of Engineering, Karjule Harya we would like to extend our heartiest thanks for accepting our invitation for workshop. Your workshop on "Electric Vehicle" will be helpful to our students.

Thank you for your motivation and benefitted valuable guidance. We are expecting similar kind of cooperation in future.

Sincerely,

HOD

Subject: Invitation as a Resource Person for 5 days online Workshop on
"Application of Artificial Intelligence & Machine Learning in Mechanical Engineering"

Respected Sir,

We are pleased to invite you as a Resource Person for the Seminar on **"Application of Artificial Intelligence & Machine Learning in Mechanical Engineering"** for our TE Mechanical students scheduled on **Monday 08/02/2021 to Friday 12/02/2021**. Your expertise and knowledge in the area would add a great value to the one and all, especially the budding engineers of the country who require the guidance and path-breaking ideas to lead their way through the tough competition in the Global market on this day.

With your vast and in-depth knowledge in the area, you would be expected to deliver the 5 days online workshop on the **"Application of Artificial Intelligence & Machine Learning in Mechanical Engineering"** as we are aware of your great contribution to this field of work.

We look forward to your presence and guidance in making the event successful.

Thanking you.

Yours faithfully,

Received

5 Days online Workshopon

"Application of AIML in Mechanical Engineering"

Syllabus Details:

Day 1 08/02/2021	Morning Session	Topic Name:	Introduction to AI & ML
		Content	Introduction to AI, Types of AI, Introduction to ML, Types of ML, Supervised learning, Unsupervised learning, Reinforcement learning.
	Afternoon Session	Topic Name:	Feature Extraction & feature selection
		Content	Introduction to Feature Extraction & feature selection Statistical features, PCA, Decision tree, Applications of feature extraction and selection algorithms in Mechanical Engineering
	Evening Session	Topic Name:	Common Application of AIML
		Content	Application of AIML in Agriculture, Medical, defense, etc.
Day 2 09/02/2021	Morning Session	Topic Name:	Classification & Regression
		Content	Introduction to Classification & Regression, different Algorithms, Decision tree, Random forest, Naive Bayes, Support vector machine, etc, Applications of classification and regression algorithms in Mechanical Engineering
	Afternoon Session	Topic Name:	Development of ML Model
		Content	Steps in ML modeling, Data Collection, Data pre-processing, Model Selection, Model training, Model evaluation.
	Evening Session	Topic Name:	Reinforced Learning & Applications of Reinforced Learning
		Content	Characteristics of reinforced learning; Algorithms, Q Learning, Applications of Reinforced Learning

Dear Madam,

It was really a great privilege to have your presence at Workshop on “**Application of Artificial Intelligence & Machine Learning in Mechanical Engineering**” which was held at our Institution on **Monday 08/02/2021 to Friday 12/02/2021**. I would like to express my gratitude for your valuable speech/presentation on “**Application of Artificial Intelligence & Machine Learning in Mechanical Engineering**” Your valuable guidance had helped us in past and in future as well. On behalf of the all the faculties of our institution, I greatly appreciate your expert talk.

I hope the same co-operation from you in near future.

Thanking you,

Yours faithfully,

HOD Mech. Engg.

Activity Report

Title	"AI and ChatGPT"
Duration	4 th Jan to 10 th Jan 2023
Name Of Speaker	Dr. S. S. Khatal
Designation	Associate Professor
Objectives	The workshop aimed to provide participants with a comprehensive understanding of Artificial Intelligence (AI) and its application in natural language processing, with a focus on ChatGPT. Participants were introduced to fundamental concepts of AI, explored practical applications of AI technologies, and gained hands-on experience in using ChatGPT for various tasks.
Beneficiary	Students of electronics and telecommunication engineering, specifically those who are interested in pursuing careers in AI and ChatGPT or related fields.
Number of Participants	84
Course Outcomes	<ol style="list-style-type: none">1. Understanding the basics of artificial intelligence, including machine learning and natural language processing. .2. Learning about the principles behind chatbots and conversational agents.3. Gaining hands-on experience in training and deploying AI models, specifically focusing on ChatGPT. .4. Developing skills in programming languages such as Python for implementing AI solutions. .5. Exploring ethical considerations and implications of AI technologies, including biases and privacy concerns.6. Practicing problem-solving and critical thinking through real-world AI applications and case studies.7. Enhancing communication skills by designing and interacting with chatbots for various purposes.8. Collaborating with peers to brainstorm ideas and work on group projects involving AI and ChatGPT.9. Acquiring knowledge of industry best practices and emerging trends in AI-powered conversational systems10. Building a portfolio of projects demonstrating proficiency in AI and ChatGPT development.

“AI and ChatGPT”

Syllabus

The following points were discussed during the Value-Added Courses

- ❖ Introduction to An Overview of Artificial Intelligence: Definitions, history, and current trends. Types of AI: Narrow AI vs. General AI. Applications of AI: Healthcare, finance, marketing, etc. Introduction to ChatGPT: History, capabilities, and use cases.
- ❖ Natural Language Processing (NLP) Basics Understanding Natural Language Processing: Text preprocessing, tokenization, and parsing. Sentiment Analysis: Techniques and tools for analyzing sentiment in text data. Named Entity Recognition (NER): Identifying and classifying entities in text. Hands-on Session: Participants engage in NLP tasks using Python libraries such as NLTK and SpaCy.
- ❖ ChatGPT in Action Working Principles of ChatGPT: Transformer architecture, training data, and fine-tuning. Building Conversational Agents: Design considerations and best practices. Use Cases of ChatGPT: Customer support, content generation, and language translation, etc.
- ❖ Practical Session: Participants create their own ChatGPT-based conversational agents and explore different use cases.
- ❖ Advanced Topics in AI Deep Learning Fundamentals: Neural networks, back propagation, and optimization algorithms. Reinforcement Learning: Basics of reinforcement learning and its applications. Ethics in AI: Bias, fairness, and responsible AI development. Future Trends in AI: Quantum computing, AI ethics, and human-AI collaboration.
- ❖ Project Presentations and Closing Ceremony Participants present their projects developed during the workshop.

Activity Report

Title	Automation technology – PLC & SCADA
Duration	36 hr.
Name of Speaker	Dr. Sunil Kumar
Designation	Assistant Professor
Objectives	The objective of the course is to provide participants with comprehensive knowledge and practical skills in automation technology, specifically focusing on Programmable Logic Controllers (PLC) and Supervisory Control and Data Acquisition (SCADA) systems.
Beneficiary	The course is beneficial for engineering students, professionals, and anyone interested in gaining expertise in automation technology for industrial applications.
Number of Participants	59
Course Outcomes	<ol style="list-style-type: none">1. Understanding the principles and applications of PLC and SCADA systems.2. Proficiency in programming PLCs for various industrial automation tasks.3. Competence in designing and implementing SCADA systems for real-time monitoring and control.4. Hands-on experience in troubleshooting and maintenance of automation systems.5. Ability to integrate PLC and SCADA systems for seamless automation solutions.6. Knowledge of industry best practices and standards in automation technology.

About the Workshop

Sponsored by

Organized by

Workshop on "Android Application Development" aims to impart technical and practical knowledge regarding app development in Android to students and future engineers. Android is a very popular and powerful OS created by Google for use on mobile devices, such as smartphones and tablets. It supports large number of applications in Smartphones. These applications are more comfortable and advanced for the users. The android is an open source operating system means that it's free and any one can use it. The android has got millions of apps available that can help you managing your life one or other way and it is available low cost in market at that reason android is very popular.

In this workshop students will get a chance to use their coding skills in Android Studio.

Expected Outcome and Benefits

- 1) Getting Practical knowledge for android app development.
- 2) Insights about Android development Technology.
- 3) Create impressive apps for business.
- 4) Create user interface for Android app.
- 5) Build application using Android platform.

Eligibility for Workshop

All the UG Graduates and Post Graduate Students and Faculties of all branches of Engineering and Industry Professionals are eligible for this workshop.

Activity Report

Title	"Network Security and Cryptography"
Duration	30 hours
Name of Speaker	Dr. A.J. Patil
Designation	Professor
Objectives	To provide students with a comprehensive understanding of network security principles and cryptographic techniques. The course aims to equip students with the knowledge and skills necessary to design, implement, and manage secure network systems, thereby preparing them for careers in cybersecurity and telecommunications.
Beneficiary	Students of electronics and telecommunication engineering, specifically those interested in pursuing careers in cybersecurity, network engineering, or related fields.
Number of Participants	08
Course Outcomes	<ol style="list-style-type: none">1. Understand the fundamentals of network security, including threats, vulnerabilities, and countermeasures.2. Gain knowledge of various cryptographic algorithms, protocols, and techniques used to secure data transmission and communication.3. Develop skills in implementing encryption and decryption mechanisms for securing network communications.4. Learn best practices for network security policy development, implementation, and management.5. Acquire hands-on experience with security tools and technologies used in real-world network security environments.6. Enhance critical thinking and problem-solving abilities in analyzing and addressing security challenges in networked systems.7. Demonstrate proficiency in designing and evaluating secure network architectures.8. Prepare for industry-standard certifications in network security and cryptography, such as CISSP, CEH, or CompTIA Security
